Warranty

Legal warranties, the 12-month manufacturer warranty on parts, what is normal after a job, and how to make a claim.

Enterprise	9572-4878 Québec inc.
Address	21 Avenue 101E, Notre-Dame-de-l'Île-Perrot, QC J7W 0L4
Business	Renn Bros, mobile tire and mechanical services
Claims	(514) 891-7366 · info@RennBros.com
Applies to	Work performed by Renn Bros on or after October 13, 2026

In short. Every repair carries the warranty provided by Québec law: three months or 5,000 km, whichever comes first, parts and labour. The parts Renn Bros supplies also carry a 12-month manufacturer warranty against defects: if one proves defective, or fails because of how we installed it, we remove it and install the replacement at no charge. Some things you notice after a job are normal operation, not defects: see article 4.

Our warranty adds to your legal rights; it never replaces or reduces them.

1. Warranties provided by law

1.1 **Repair warranty.** Under section 176 of the *Consumer Protection Act* (CQLR, c. P-40.1), repairs to an automobile are guaranteed for three months or 5,000 kilometres, whichever occurs first. The guarantee covers parts and labour and takes effect when the vehicle is returned to you after the work. It does not cover damage resulting from abuse after the repairs (section 177).

1.2 **Warranty of quality.** Parts we sell must be fit for the purpose for which they are ordinarily used and remain so for a reasonable length of time, having regard to their price, the contract and their conditions of use (sections 37 and 38 of the Act; articles 1726 and following of the *Civil Code of Québec*). Any manufacturer's warranty on a part also applies.

1.3 **Your rights are preserved.** Nothing in this document excludes, limits or replaces these legal warranties. Where this document and the law differ, the law prevails.

2. Parts: 12-month manufacturer warranty

2.1 **Coverage.** Each part supplied and installed by Renn Bros comes with a 12-month manufacturer warranty against defects in materials and manufacture, from the date of the work.

2.2 **Our part of it.** If, within those 12 months, a part we supplied and installed proves defective, or fails because of how we installed it, Renn Bros removes the defective part, obtains the replacement under the manufacturer's warranty, and installs it, at no charge to you for parts or labour, at your location within our service area.

2.3 **What it is not.** This is not an all-inclusive warranty on the vehicle. It covers defects in the parts we supply and in our installation of them, as set out above, in addition to the legal warranties of article 1.

2.4 **Free of charge.** It is included in the price of the work. There is no separate fee and nothing to register.

3. What the 12-month warranty does not cover

3.1 The following are excluded from the 12-month warranty described in article 2. They remain covered by the legal warranties of article 1 where the law so provides.

a. parts supplied by the customer (the labour to install them remains covered by the legal repair warranty of three months or 5,000 km);

b. normal wear: brake pads and rotors, wiper blades, tires and similar wear items, once they have been used beyond their normal service life;

c. damage caused by an accident, collision, road hazard, fire, flood, vandalism, misuse, racing or neglect after the work;

d. damage caused by work done on the same part or system by anyone other than Renn Bros after our visit;

e. failure of another component that was not part of the work, unless it was caused by the part we installed or by our work.

4. Normal operation, not a defect

4.1 The following are normal after the work described and are not defects covered by article 2. If you are unsure whether something is normal, contact us: we would rather check.

Brakes

- Surface rust on the rotors after rain or a night parked outside is normal and clears after a few stops. Cast-iron rotors do this; it isn't a defect.
- Light brake noise in cold or damp weather is normal, and so are some pad dust and noise during the first 200 km while new pads bed in.
- Pads and rotors are wear items: how long they last depends on how and where you drive.

Tires and wheels

- Have the wheel nuts re-torqued after about 100 km of driving.
- TPMS sensor batteries last about 5 to 7 years. A sensor that dies of old age isn't caused by tire work.
- New tires won't fix uneven wear caused by bad alignment or worn suspension. We tell you if we see it.
- Punctures, pothole damage and curb hits are road hazards, not defects.
- Balancing corrects vibration from imbalance only, not a bent rim, a separating tire or worn suspension.

Oil

- A few drops in the driveway after an oil change are usually leftover oil on the underbody, not a leak. Wipe it and keep an eye on it.
- Some engines use oil between changes. Check your level once a month.

Battery

- A new battery won't fix a parasitic drain or a weak alternator. We test both before replacing the battery.

- The battery carries the manufacturer's warranty; our warranty covers fitting it.

Diagnostic and inspection

- The $125 diagnostic covers finding the problem. The repair is quoted separately.
- An intermittent problem may not show up while we're there.
- A pre-purchase inspection is our professional opinion on what can be seen and tested that day, without taking anything apart. It isn't a guarantee against future breakdowns.

Air conditioning

- If the system leaks, a recharge is a temporary top-up: the refrigerant will escape again. Fixing the leak is quoted separately.
- Refrigerant is billed by the amount used. Newer R-1234yf systems cost more to recharge than R-134a.
- A/C output depends on the outside temperature: on a 35 °C day, vent air 15 to 20 °C cooler than outside is normal.
- A recharge doesn't fix a worn compressor, a leaking condenser or a dead blower fan.

Mobile service

- Badly rusted or seized hardware (wheel nuts, caliper bolts) can add labour. We show you and get your OK before continuing.
- Rust already under the car, or weakened jack points found when lifting it, aren't caused by our work. We photograph existing damage before we start.
- Tell us about modifications when you book (lowered suspension, wheel spacers, oversized wheels): some jobs can't be done safely on a modified car.
- We need a safe, flat spot to work. If conditions aren't safe, we reschedule at no charge.

---

5. How to make a claim

1. Contact us as soon as you notice the problem, at (514) 891-7366 (call or text) or info@RennBros.com, and tell us what the vehicle is doing. Keep your invoice or give us your booking reference.
2. We arrange a visit to inspect the vehicle. If the problem is covered, we repair it at no charge.
3. If the work cannot be done safely at your location, we tell you why and agree with you on how it will be handled.
4. If we conclude that the problem is not covered, we explain why in writing on request. You keep all your recourses under the law.

5.1 Please do not have the covered part repaired elsewhere before contacting us, except in an emergency. In an emergency, keep the replaced part and the invoice so that we can assess the claim.

---

6. Beneficiary and duration

6.1 The legal repair warranty follows the vehicle. The 12-month warranty of article 2 is given to the customer named on the invoice.

6.2 Warranty periods begin on the date the work is completed and the vehicle is returned to you, as shown on the invoice.

7. Information and complaints

7.1 For any question about your warranty rights, contact Renn Bros or the Office de la protection du consommateur (opc.gouv.qc.ca, 1-888-672-2556). The rules governing automobile repairs are set out in sections 167 to 181 of the *Consumer Protection Act*.
